

Says

What have we heard them say? What can we imagine them saying?

Thinks What are their wants, needs, hopes, and dreams?

What other thoughts might influence their behavior?

It provides vital connectivity on a national, regional and international scales.

It requires less time.

Air transport provides comfortable, efficient, quick transport services.

It is the fastest mode of transport suitable for carriage of goods over a long distance.

I think air transport is an important enabler to achieving economic growth and development.

It helps to genarate trade,promote tourism, and create employment opportunities.

I think airways are suitable when rivers get flooded.

I think air transport is safety, regulation and capacity building.

GLOBAL AIR TRANSPORTATION NETWORK

Transport makes a contribution to the climate change,carbon dioxide emission from air travel.

A survey examines attitudes, norms and behavioural intention regarding air travel.

Attitudes to the air travel behaviours are distinct from other environmental behaviours.

Desire to reduce air travel needs to be aligned with other energy saving behaviours.

Where aircraft are moving more slowly must be seprated from other aircraft by atleast 3 miles and 1000 feet.

The challenges include infrastructure limitation , regulatory compliance, high cost structure, security concerns, environmental impacts.

Recurrent delays and unpredictability of schedules in the commercial aviation system are major problems for airlines.

Reducing congestion and delay in the air transportation system is a decades long public goal that become more urgent recent years.

What behavior have we observed? What can we imagine them doing?
